

CHAMBER OF COMMERCE
& VISITOR CENTER

Mission: To support our membership through cooperative economic development and community service.

July 12, 2023

Rear Admiral Megan Dean
Commander - 17th Coast Guard District
United States Coast Guard

Admiral Dean:

I am writing in full support of the recertification of the Cook Inlet Regional Citizens Advisory Council (CIRCAC). Since its creation in 1990, CIRCAC has been Cook Inlet's most effective organization for promoting programs to prevent spills, enhance safety in both marine transportation and oil facilities operations, and protect Cook Inlet's waters, shorelines, cultural, natural, and wildlife resources.

Not only does CIRCAC advocate for better regulatory oversight and safety measures, they contribute concrete solutions on how to achieve those goals. This includes conducting risk assessments, sharing data, developing applicable tools and strategies, evaluating best available technology, engaging the public, and thoroughly reviewing contingency plans and regulations that prioritize prevention while promoting safety. No other organization has focused as much attention for as many years to identifying, assessing and mitigating risks in this region.

CIRCAC has been proactive in working with the Alaska Department of Environmental Conservation (ADEC) on a suite of regulatory updates, approved in 2021. CIRCAC worked with the agency, industry partners and through various public outreach campaigns to educate and support updates that strengthened the state's spill response rules.

Working with industry and multiple local, state and federal agencies, CIRCAC has expanded its Ice Camera Network. The information provided by these cameras has significantly reduced the risk of an incident in Cook Inlet's dynamic winter conditions and highlights CIRCAC's ability to develop partnerships and share information.

CIRCAC's science program provides valuable data about coastal habitats, physical oceanography and oil behavior. They recently entered a three-year agreement with the Bureau of Ocean Energy Management (BOEM) to compile historical contaminants data from Cook Inlet into an integrated database for online access.

CIRCAC continues to provide its stakeholders and the public an avenue through which they can work with industry and regulators to ensure safe operations in the region.

CIRCAC's accomplishments in the last three years include, but are certainly not limited to:

- Updated Alaska ShoreZone visual data with new surveys along the outer Kenai Peninsula coast

CHAMBER OF COMMERCE
& VISITOR CENTER

Mission: To support our membership through cooperative economic development and community service.

- Received study plan approval from BOEM for data needs for model validation in Cook Inlet
- Advocated for a strengthening of oil spill prevention and response regulations
- Increased public outreach efforts through new, local advertising, exhibits and expanding audiences for its newsletter, website, and social media
- Expanded Geographic Response Information Database (GRID) in scope and accessibility
- Participated on and provide expertise to the Cook Inlet Harbor Safety Committee
- Expanded the Cook Inlet Ice Monitoring Camera Network with modern video technology

The Homer Chamber of Commerce & Visitor Center represents over 460 Homer area businesses, and we understand first-hand the importance of bringing together a varied group of stakeholders to programs to promote the safe production and transportation of oil in Cook Inlet.

I strongly urge the U.S. Coast Guard to recertify CIRCAC so that it can continue to build on its work and positively impact the future of Cook Inlet.

Sincerely,

A handwritten signature in black ink, appearing to read "Brad Anderson", is written over a light blue horizontal line.
